Research Instruments and Appendices

Project Title: The Impact of Artificial Linguistic Veneer (ALV) on Oral Defense Performance: The Moderating Role of AI Agency Author: Dr. Pegah Meriki Field: Applied Linguistics / Educational Technology

Appendix A: Artificial Linguistic Veneer (ALV) Rubric

This rubric is used to quantify the level of "Artificial Linguistic Veneer"—the gap between polished, AI-generated text and the student's actual communicative competence.

Dimension	Descriptor (Low ALV - 1)	Descriptor (High ALV - 5)	Score (1-5)
Lexical Sophistication	Vocabulary matches the student's general proficiency level.	Contains high-frequency "AI-style" buzzwords (e.g., transformative, multifaceted, delve).	
Syntactic Complexity	Sentences are varied but natural; occasional errors in complex structures.	Unnaturally perfect, long, and embedded clauses; lack of typical human errors.	
Tone & Register	Maintains a consistent, personal academic voice.	Overly formal, "robotic" neutrality, or excessive use of passive voice without purpose.	
Cohesion	Uses standard linking words (e.g., However, Therefore).	Over-reliance on "AI-standard" transitions (e.g., Furthermore, Moreover, In conclusion).	

Dimension	Descriptor (Low ALV - 1)	Descriptor (High ALV - 5)	Score (1-5)
Authenticity	Reflects the student's personal insights and idiosyncrasies.	Polished but generic; lacks the "human touch" or specific personal nuance.	

Appendix B: AI Agency Scale

This scale measures the degree of intentionality and critical engagement a student exercises when using AI tools.

Instruction: Please rate your agreement with the following statements on a scale of 1 (Strongly Disagree) to 5 (Strongly Agree).

1. I critically evaluate every suggestion made by the AI before incorporating it. (___)
2. I use AI to brainstorm ideas, but the final structure and voice are mine. (___)
3. I am aware of the potential biases and hallucinations of AI tools. (___)
4. I feel in control of the writing process, even when using AI. (___)
5. I explicitly modify AI-generated output to match my own speaking style. (___)

Appendix C: Oral Defense Performance (ODP) Protocol

Scoring criteria for the viva voce / oral defense stage.

Criterion	Key Indicators	Weight	Score (1-10)
Spontaneous Response	Ability to answer unexpected questions without scripted notes.	30%	
Conceptual Depth	Demonstrates deep understanding of the underlying theory/data.	40%	
Linguistic Consistency	Matches the level of complexity found in the written thesis.	30%	

Appendix D: Informed Consent Form

Study Title: ALV and Oral Defense Performance Researcher: Dr. Pegah Meriki

I hereby agree to participate in this research study. I understand that my written thesis and oral defense performance will be analyzed for research purposes. I have been assured that: - My identity will remain strictly anonymous. - All data will be used for academic research only. - I can withdraw my participation at any time without penalty.

Participant Signature: _____ Date: _____

Appendix E: Expert Validation Form

For validating the ALV Rubric and AI Agency Scale.

Expert Name: _____ Specialization: _____

Item/Section	Relevance (1-4)	Clarity (1-4)	Qualitative Feedback
ALV Rubric Items			
AI Agency Scale			
ODP Scoring			

Appendix F: Participant Scoring Sheet (Sample)

Participant ID: [e.g., P01] - ALV Score (Rubric A): _ (Avg) - AI Agency Score (Scale B): (Total) - ODP Score (Protocol C): _ (Total/10)

Ethical Statement

This study was conducted in accordance with ethical standards for human subject research. All participants provided written informed consent. Data was anonymized using ID codes to protect participant privacy. The use of AI tools in this study was strictly for analytical and research-driven observation, ensuring that academic integrity was maintained throughout the evaluation process.
